DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a catalytic converter subassembly, classified in class 422, subclass 177.
 - II. Claims 9-22, drawn to a method for manufacturing a catalytic converter subassembly, classified in class 29, subclass 890.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as the one not requiring a mold, nor an endcone.
3. If indeed Applicants elect Group II, claims 9-22, a further restriction is required.
 - IIa. Claims 9-13, not requiring the aligning step, nor containment area nor endcones.
 - IIb. Claims 14-17, not requiring a mold and the aligning step.
 - IIc. Claims 18-22, not requiring a catalyst substrate.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 1764

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
